DETAILED ACTION

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Golden et al (U.S. 6,272,127) and in view of Wlaschin (U.S. 6,182,121).

As per claims 1, 8, 17 Golden disclosed a method comprising: receiving a request for a portion of a file system by a client (notifying whether the portion is stored in a first location associated with portions of the file system that have been previously stored by the client (col. 28, lines 35-53); However Golden did not disclose in details if not, determining whether the portion is stored in a second location associated with portions of the file system that were streamed to the client by a server.

In the same field of endeavor Wlaschin disclosed Partitions can be of various types. Journal partitions may be written to by a user and contain the user's updates to shared data items. In preferred embodiment, journal partitions reside on a storage device associated with a client computer in a client-server architecture (col. 4, lines 18-29).

Art Unit: 2141

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated Partitions can be of various types. Journal partitions may be written to by a user and contain the user's updates to shared data items. In preferred embodiment, journal partitions reside on a storage device associated with a client computer in a client-server architecture by Wlaschin in the method of Golden to improve the method's storing capability and make the file allocation method more diverse.

4. As per claim 2,15,19 Golden-Wlaschin disclosed further comprising retrieving the portion from the server if not stored in the second location (Wlaschin, col. 18, lines 15-28).

5. As per claim 3,13 Golden-Wlaschin disclosed wherein identifying further comprises associating portions of the file system used by the client during start-up with the first location (Wlaschin, col. 4, lines 18-29).

6. As per claims 4,14,19 Golden-Wlaschin disclosed wherein determining further comprises associating the second location with portions of the file system that were streamed to the client using a multicast operation (Golden, col. 37, lines 26-32).

7. As per claims 5,22,23 Golden-Wlaschin disclosed wherein associating further comprises: monitoring accesses to a plurality of portions of the file system during start-up; retrieving the plurality of portions from the file system; and storing the plurality of portions in the first location (Golden, col. 28, lines 35-52).

Art Unit: 2141

8. As per claim 6,20,21 Golden-Wlaschin disclosed wherein associating further comprises: retrieving a plurality of portions from the file system using multicasting; and storing the plurality of portions in the second location (Golden, col. 37, lines 39-53).

9. As per claim 7,24 Golden-Wlaschin disclosed further comprising waiting for the portion 2 to be streamed to the client if not stored in the second location (Wlaschin, col. 4, lines 56-64).

10. As per claim 9 Wlaschin disclosed wherein the first location is a non-volatile storage medium (col. 6, lines 24-28).

11. As per claim 10,18 Golden-Wlaschin disclosed wherein the non-volatile storage medium is a flash memory device (Golden, col. 11, lines 1-5).

12. As per claim 11 Golden-Wlaschin disclosed wherein the second location is a volatile storage medium (Golden, col. 30, lines 22-34).

13. As per claim 12 Golden-Wlaschin disclosed wherein the volatile storage medium is a memory device (Golden, col. 30, lines 22-34).

14. As per claim 16 Golden-Wlaschin disclosed wherein the contents of the second location are procured as a background operation (Wlaschin, col. 11, lines 26-35).

Art Unit: 2141

Applicant's arguments are as follows:

15. Applicant argued that prior art did not disclose receiving a request for a portion of a file system by a client.

As to applicant's argument Golden disclosed, "That is the outgoing network data is fragmented among the assigned bearer channels for that connection (as maintained by bonding function 123)" (col. 28, lines 41-43). One ordinary skill in the art at the time of the invention interpreted the portion of the file system as the file consists of data and the portion of the file system as fragment of a network data.

Conclusion

16. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
